

Label Template How-To

The Steps

1. Download your templates from your order email and save to a location that is familiar to you, usually your C: drive and My Documents.
2. Open your desired program and then open the template you'd like to work on. Save this template as the name of your product i.e. 8_Oz._Boston_Lotion.
3. Make the changes you need to make for your personal label and save.
4. Print your edited label document to plain paper or paper of your choice – or – print to a full-sheet adhesive sheet.
5. Cut out your labels and run through a Xyron label adhesive machine or apply spray adhesive of your choice. Or is using a full-sheet adhesive sheet, cut out your labels.
6. You're now ready to apply to your packaging items.
